

# Make a Superhero Puppet

① Take a piece of cardboard roll (eg. a kitchen paper roll cut in half)

② Next, cut a piece of coloured paper, or find a piece, that measures one quarter of A4 →

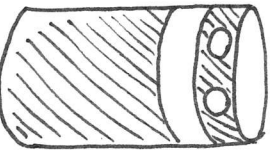

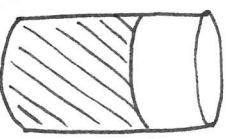

③ Put glue along one of the short edges of this piece and position this on the cardboard roll towards one edge. Stick on and wrap the paper around, finally putting glue on to this edge to fix in place →

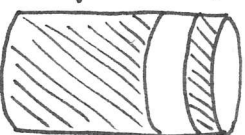

Now your roll looks like this.

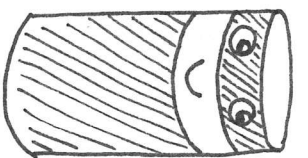

④ Next cut a thin strip of the same colour paper, and wrap this around the top edge, sticking on in the same way as you did with the big piece

⑤ Stick 2 white stickers (or shapes you have cut out) onto the top strip. This area is the mask with the eye holes!

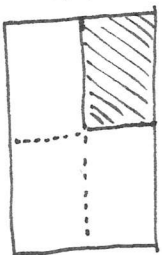

⑥

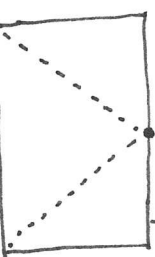

Draw the eyes on the white circles (eye shapes) and a mouth in the section below, between the mask and the coloured 'costume'.

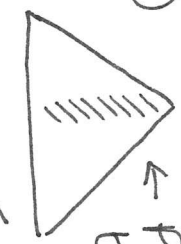

⑦ Take a piece of different coloured paper to make the cape. This needs to be cut from one quarter of A4 too, but folded a different way.

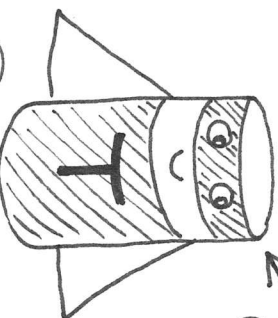

⑧ When you have your  $\frac{1}{4}$  section, draw a point in the middle of the top of this piece.

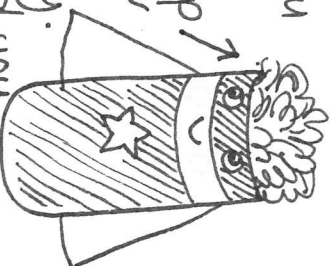

Then cut from the bottom corners to the point at the top to make a triangle.

⑨ Put glue down the middle of the triangle, then lie your superhero puppet on top of it to make it stick on.

⑩ To add hair, you can push a handful of wool into the top of wool into the top of a letter or stick a star onto the body.

⑪ Put your fingers inside and you can whoosh your superhero all around!
